

Science

*As the energy flows like the current of waves,
Einstein once discovered the earth's true phase.*

As the sun and the moon were meant to be,

The periodic table will show the key.

From the strongest metal to the softest air,

Everyone has known that atoms are there.

The heart will pump, like a machines rage,

Where atoms are sealed like a bird in a cage.

The night has come it's time to sleep,

Like the temperature is low, in the ocean beneath.
